

SPECIAL EDUCATION LOGS SOFTWARE

TRACKING SERVICES WITH FEDERAL FUNDING SUPPORT

*User-friendly app **enhances** tracking service data and progress monitoring, **ensuring** compliance.*

Designed for use by special education teachers and service providers, the Athlos app solution is eligible for federal, state and local funding sources. By exploring these opportunities, your district or school may identify many different methods of purchasing the Athlos Special Education Service Logs App.

Athlos helps make the required work of documenting and reporting services for students as well as progress monitoring simpler, more efficient, and easier to communicate.

TITLE I

- The Athlos App gives service providers the insight they need to target students' greatest areas of instructional need and provide services that address those needs specifically.
- By sharing relevant progress and service data with administrators and providers, service providers have more time to deliver targeted, high quality intervention to students with the most need.

TITLE II

- Professional development provided by the Athlos App team supports special education administrators and educators in their proper documentation of IEP related services.
- With greater visibility into student needs and services provided by the Athlos app, leaders can better tailor professional development for teachers and service providers to the specific needs of their students.

TITLE IV

- The Athlos App allows schools and districts to leverage iPads, Chromebooks, tablets, and laptops for purposeful, thorough documentation of IEP required services and interventions.
- The flexibility of the app provides access for teacher and service providers to review and document student data regardless of implementation model, short- or long-term school closures.
- Documentation of services via the Athlos app offers critical insights into the ongoing health and safety of many students with disabilities.

ATHLOS
SPECIAL EDUCATION
SERVICE LOGS

"This is a stress-free, efficient way to document services, to have peace of mind knowing that you can go in at any time and know that services are being delivered, that IEPs are being followed."

IDEA

- Athlos App data can assist with reporting requirements at the state and federal level on the IDEA-mandated services and interventions provided to students with disabilities.
- Aligned with data reporting requirements for IDEA, the Athlos app data reports and reporting features provide data that assists in identifying programmatic strengths and areas for improvement, allows teachers and service providers to address root causes of poor performance, and evaluate student and school progress toward outcomes

SPECIAL EDUCATION LOGS APP

MAKING THE MOST OF EMERGENCY FUNDING

Washington Edition

With the recent passage of the \$2 trillion **American Rescue Plan**, Washington's K-12 schools are poised to receive \$1.85 billion in assistance, far and away the largest of the three COVID-19-related relief acts (**CARES Act**, **CRRSA**), of which at least 20% - upwards of \$333 million - must be spent on activities and programs that mitigate learning loss.

ESSER, ESSER II & ARP ESSER

- The Athlos app assists in the **COVID-19 response for special education teachers and service providers**, who have seen their service model disrupted by the current pandemic.
- With the app, providers can document and share both virtual and in-person services, service attempts, attendance and student progress.
- The data gathered and presented through the Athlos app can be vital to determining the scope of **learning loss** for special education students, one of the hardest-hit groups during the pandemic, and documenting all attempts to **serve students in all phases of school closure and reopening**.
- The service provision data created and maintained within the Athlos app can bolster the required detailed district and state **accounting and reporting** of the use of ESSER, ESSER II and ARP ESSER funds, with a focus on how the State is using funds to measure and address learning loss among students disproportionately affected by the coronavirus and school closures, including children with disabilities. Streamlining progress and service data gives providers more time to deliver **targeted, high quality intervention** to students with the most need.

OBLIGATION & SPENDING TIMELINES

March 13, 2020

National Emergency Declared

Pre-Award Costs Eligible for all funds

Athlos works with districts on flexible billing and payment timelines to accommodate reporting requirements.

WASHINGTON FUNDING NOTES

- Washington will pay ESSER I, II and III funds to districts by reimbursement through I-Grants of allowable expenditures per federal law. Districts must first receive OSPI approval of their reopening plan, complete an FP120 Application and Budget matrix, then submit monthly grant claims, first for ESSER I funds, then ESSER II funds.
- Released last year, **OSPI's Priorities for ESSER Funds** set statewide emphasis on four statewide initiatives and encouraged them in district work: Support students furthest from educational justice, prepare for health and safety, invest in connectivity and hardware, and leverage local expertise and provide training.
- The state has also released detailed guidance about Special Education services, delivery and reporting through the end of the 2020-2021 school year.
